Part 1: REGULATION AND LICENSING STATEMENT

1. Company Information

Orbi Trade International Ltd (“The Company”) is a company that is incorporated under the Laws of the Republic of Seychelles (Companies Act 1972), with the registration number of 8433020-1.

2. Regulatory Authorization

The Company is authorized and regulated by the Financial Services Authority of Seychelles (FSA) as a Securities Dealer, holding License Number SD165.

3. Scope of Services

Under its license, the Company is permitted to provide Contracts for Difference (CFDs) and other related financial services to any legal entity or a natural person (“Client”), subject to the applicable laws and regulations of Seychelles.

4. Supervision

The Company is supervised by the Seychelles FSA to ensure compliance with regulatory obligations in Seychelles, including but not limited to:

- a. Capital adequacy requirements,
- b. Securities regulation,
- c. Company’s establishment and legality,
- d. Anti-Money Laundering (AML) and Counter-Terrorism Financing (CTF) controls,
- e. Fair treatment of Clients,
- f. Fair Trading,
- g. Consumer Protection,
- h. Risk management and transparency in operations, and
- i. Other regulation thereafter.

5. Transparency and Accountability

- 5.1. The Company shall maintain full transparency on its legal status and licensing status.
- 5.2. Any changes to the company’s legality, regulatory authorization, and/or license shall be communicated and/or informed through the official website and/or through the Client’s email.

Part 2: RISK DISCLOSURE & WARNING NOTICE

1. General Risk Warning

Trading Contracts for Difference (CFDs), foreign exchange (forex), precious metals, indices, commodities, and cryptocurrencies involves a high level of risk. Such instruments are highly leveraged and may not be suitable for all investors. The Client may lose part or all of their invested capital.

2. Market Risk

Prices of financial instruments can move rapidly due to news events, economic data, geopolitical developments, or market sentiment. High volatility may cause slippage, requotes, widened spreads, or execution at less favorable prices.

3. Leverage and Margin Risk

Trading on leverage means that small market movements may have a large impact on account equity. The Client may sustain losses greater than the funds initially deposited. Failure to maintain sufficient margin may result in automatic liquidation (stop-out).

4. Liquidity Risk

Certain market conditions, including thin liquidity or extraordinary volatility, may prevent the execution of orders at the requested price. The Company does not guarantee that stop loss or take profit orders will always be executed at the specified levels.

5. Technical and System Risk

Electronic trading is subject to risks, including internet outages, hardware/software failures, latency, or server disruptions. Such events may result in delayed, partial, or failed executions.

6. Regulatory and Political Risk

Regulatory changes, government actions, sanctions, or unexpected political events may impact the availability, pricing, or legality of certain instruments.

7. No Guarantee of Profit

The Company does not provide any guarantee of profit or protection against losses. Past performance of any trading strategy or signal provider does not guarantee future results.

8. Client Responsibility

The Client is responsible to acknowledge and accept that:

- Trading, both in CFDs and forex, are speculative in nature.
- The invested funds are placed voluntarily.
- Any decisions regarding to the trading including but not limited to their account and deposits are made solely by the Client.

9. Acknowledgement

By opening a trading account and using the Company's services, the Client confirms that they have read, understood, and accepted the risks described in this Risk Disclosure & Warning Notice.

Part 3: CLIENT AGREEMENT

1. Introduction

This Agreement is entered into by and between Orbi Trade International Ltd (the "Company") on the one part and the Client who has completed the Account Opening Application on the other part.

The Company is authorized by the Financial Services Authority of Seychelles with Securities Dealer's License Number SD165.

This Client Agreement together with the following documents found on the Company's website (namely "Orbi Trade Trading Rules", "Partnership Agreement", "Warranty Algorithm", "Warranty Maximum Spread", "Terms and Conditions"), as amended from time to time, (together the "Agreement"), as well as any other documentation posted on the website or communicated to the Client as a result of their participation in any of the Company's campaigns and/or loyalty programs, set out the terms under which the Company will offer services to the Client and shall govern all CFD activity of the Client with the Company during the course of the Agreement.

This Agreement overrides any other agreements, arrangements, express or implied statements made by the Company or any Introducers.

The Company will collect, use, store, and otherwise process personal information of the Client as set out in the Privacy Policy, as amended from time to time and available on the Company's website.

2. Risk Understanding Statement

Under no circumstances shall Orbi Trade be responsible for any indirect or consequential losses, including lost profits, loss of goodwill, or missed profit opportunities.

The Parties agree that the liability limitations stated herein are the result of fair and reasonable negotiations, considering the circumstances that were or should have been known by the Parties regarding these trading terms.

All Trading Rules and related activities are subject to the laws of Seychelles. Any claims or disputes, including but not limited to losses allegedly caused by the Company, shall be resolved exclusively under Seychelles law under the competent jurisdiction.

If any issues arise or if Clients have important questions, the Company will provide a Trading Journal Report and historical Tick Price data from its server upon request. Clients may reach the Company on WhatsApp at +1 737 232 2299 (English) or +62 8 111 717 999 (Bahasa Indonesia).

3. Client Acceptance and Due Diligence

- 3.1. The Company reserves the right not to accept the Client as its client, to refuse to open a trading account, to refuse to accept any funds, and/or to restrict the Client from initiating trading activities until the Client properly completes and submits the Account Opening Application Form together with all required identification documentation and all internal Company checks (including but not limited to AML checks, appropriateness tests, and identification procedures) are fully satisfied.
- 3.2. The Company reserves the right during the business relationship with the Client to request additional documentation and/or information as part of its ongoing monitoring. The Company may impose enhanced due diligence requirements for Clients residing in certain jurisdictions.
- 3.3. The Client acknowledges that failure to satisfy the Company's identification and due diligence requirements within the specified time period may result in restrictions, return of funds, and/or termination of the business relationship at the Company's discretion.

4. Cost and Taxes

- 4.1. All services and operations under this Agreement that are subject to applicable charges (“Costs”), including but not limited to commission, minimum margin deposit, and/or other costs related thereafter, as published on the Company’s websites, Client Personal Area and/or Investor Management System (IMS), and/or other forms of communication by the Company.
- 4.2. Costs related to CFD trading in the platform may be charged at opening, during lifetime (trading position of a Client is active), and/or upon closing of positions.
- 4.3. The Company may amend or change the Costs at any time, where such changes or amendment shall be notified to the Client by email, websites, and/or other methods of communication with the Client.
- 4.4. The Company may pay or receives fees, commissions, value-added products and/or services, and/or other benefits to and/or from third parties, as permitted under applicable regulations.
- 4.5. The Client is solely responsible for any administration duties, stamp duties, and tax obligation, including but not limited to filing tax return, tax reporting, and paying all taxes arising from the trading activities.
- 4.6. The Client agrees to pay all costs incurred as stated in this Agreement.

5. Special Market Conditions And Force Majeure

- 5.1. The Company reserves the right to determine any emergencies, extraordinary, and/or unpredictable conditions, which may result in market’s sudden change, suspension or closure, temporarily or permanently.
- 5.2. The Company shall make every effort to ensure to correct reproducible errors and defects under the Company’s standard.
- 5.3. The Company will not provide any warranties in the event that a force majeure occurred.

5.4. The events that shall be deemed and construed as force majeure (based on Article 5.3 of this Agreement) are limited to the following circumstances:

- The following are some examples of events considered as force majeure:
- Natural Disasters: Earthquakes, floods, storms, wildfires, tsunamis, and volcanic eruptions.
- Other Natural Events: Landslides, snowstorms, and extreme drought.
- Social Events: Riots, wars, acts of terrorism, uprisings, and revolutions.
- Government Policies: New regulations, embargoes, border closures, and sudden policy changes.
- Epidemics and Pandemics: Widespread disease outbreaks such as the COVID-19 pandemic.
- Infrastructure Disruptions: Power outages, IT system failures, and damage to essential infrastructure.
- Other Extraordinary Events: cyber-attacks, fires in warehouse, factories, and/or production facilities, and major industrial accidents.

Therefore, when force majeure is declared, the affected party will not be considered in breach and may be excused from the obligation to fulfill contractual duties for the duration of the force majeure period.

6. Operational and Trading Hours

6.1. The Company's operational hours is generally 24 hours.

6.2. For specific instruments, the trading hours may vary. Client may refer to Part 8 of The Trading Rules for more details.

7. Client's Requirement

The Client is eligible and qualified to make an account and conduct any activities thereafter, warrants that:

- At least 18 years old or more;
- Legally and/or mentally capable; and
- Has financial capabilities.

8. Personal Data

- 8.1. The Client hereby agrees that all of their personal data, including but not limited to name, ID Number, Tax ID, email address, phone number, bank account, biometrics, and/or other information that is deemed personal and private, may be collected, transmitted, and/or used by The Company or third party related, for the purpose related to their trading account and/or purposes required for compliance of regulations, legislation, and/or other provisions subject to the applicable law.
- 8.2. The Company warrants that all personal data as stated above, are processed and stored safely within the Company's system.
- 8.3. The Client shall notify and/or inform The Company on any changes to the personal data as stated above, through the email and/or other means of communication with the Company.
- 8.4. In any event that there is a suspicious and/or potential unauthorized request and/or changes, The Client must immediately notify the Company.
- 8.5. In any event that the Company finds the changes to be suspicious and/or unauthorized, The Company may dismiss such request for changes and/or temporarily disable the account.

9. Training

The Company and The Client warrants that:

- The Company offers training programs occasionally to the Client, especially those who are joining the Member Get Member Program.
- Any Client, particularly those who are joining in the Member Get Member Program, shall participate in the training programs held by the Company.

10. Reporting on Financial Statement

- 10.1. The Client may access their Financial Statement (Daily Statement) directly through the website.
- 10.2. The Client must ensure that the Financial statement and result of transaction will be automatically recorded on online system of ORBI TRADE.

10.3. The Client shall immediately review and report for the error in the Financial Statement report.

11. Wrong Quote

The Company has the right to make corrections/cancellations of transactions according to the current price under the following conditions:

- An error occurs in exceptional circumstances, such as in a highly volatile market before or after a news release.
- It occurs when a transaction is based on a price delay and Wrong Quote, such as an incorrect price when the market is active.
- All of the above provisions will be thoroughly reviewed before any action is taken by the Company.

12. Change Password When Opening A Trading Account For The First Time

When you open a trading account for the first time, you will receive your account password from your admin and/or trading advisor. It is essential that you IMMEDIATELY CHANGE the PASSWORD to one of your choice, ensuring it is easy to remember.

Here is a tutorial for changing the password in Meta Trader 5:

- Select "Manage Account"
- Choose "Change Password"
- Click "Change Master Password"
- Enter Your Old Password & Enter a New Password (make sure it's easy to remember)
- Click "Next"
- Done

13. Conflict of Interest Policy

13.1. This Policy sets out the procedures by which the Company identifies, manages, and discloses conflicts of interest that may arise in the course of providing services to Clients. The objective is to ensure fair treatment of all Clients and to protect the integrity of the financial markets.

13.2. Definition of Conflict of Interest

A conflict of interest arises when the interests of the Company, its employees, or its partners may conflict with, or appear to conflict with, the interests of a Client. Such situations may include, but are not limited to:

- The Company acting as a counterparty to a Client's trade (market maker model).
- Introducing Brokers (IBs) or partners being incentivized in a way that may not align with the Client's best interest.
- Employees of the Company trading for their personal accounts in the same instruments as Clients.
- Receipt of benefits (monetary or non-monetary) from third parties in relation to services provided to Clients.

13.3. Identification and Management

The Company implements the following measures to identify and manage conflicts of interest:

- Segregation of duties between trading, risk management, and client service functions.
- Prohibition of unauthorized employee trading in Client accounts.
- Monitoring of IBs and partners to ensure their marketing practices are transparent and not misleading.
- Disclosure of material conflicts to Clients when they cannot be effectively managed.

13.4. Disclosure

If a conflict of interest cannot be effectively avoided or managed, the Company will disclose the nature of the conflict to the Client in writing before proceeding with the service.

13.5. Client Protection

The Company undertakes to always act honestly, fairly, and professionally in accordance with the best interests of the Clients.

13.6. Review

This Policy shall be reviewed periodically to ensure its effectiveness and compliance with applicable regulations.

14. Execution of Transactions

- 14.1. The Client understands and accepts that all trading transactions executed through the Company's electronic platforms are subject to market conditions, liquidity, and external factors. Such factors may result in price slippage, requotes, delayed execution, widened spreads, or technical failures. The Client acknowledges that these risks are inherent in electronic trading and that the Company shall not be held liable for losses arising from such conditions.
- 14.2. Orders, including market orders, pending orders, stop loss and take profit orders, are executed in accordance with the Company's Trading Rules. The Client accepts that during periods of high volatility, there may be delays in execution and that stop loss or take profit orders may not be executed at the exact price specified, but at the next available market price.
- 14.3. The Company applies Negative Balance Protection, ensuring that the Client's account balance shall not fall below zero under normal market conditions. However, due to extremely fast price movements or extraordinary volatility, it is possible that a Client's account may temporarily reflect a negative balance if the available margin is insufficient to absorb such movements. In such cases, the Client shall not be liable to cover the negative balance. Instead, the Client may request the Company to reset the account balance back to zero before the account can be used for further trading activities.
- 14.4. Detailed rules regarding margin requirements, stop-out levels, warranty mechanisms, and other execution-related conditions are specified in the ORBI TRADE Trading Rules, which form an integral and binding part of this Agreement.

15. Complaints Handling Procedure

15.1. Scope

This Complaints Procedure sets out how the Company will handle complaints and disputes raised by the Client.

15.2. Filing a Complaint

- The Client may submit a complaint in writing by filling and submitting Official Complaint Form or the Warranty Form provided by the Company.
- The Complaint Form or Warranty Form shall be sent via email to the following address: support@orbitrade.id or through the designated Client Official Portal.
- The Complaint or Warranty Form shall include the Client's full name, account number, contact details (email and/or phone number), a clear description of the issue, and the proof of such related issue thereof.

15.3. Acknowledgement

The Company shall acknowledge receipt of the complaint within five (5) Business Days from the date of submission.

15.4. Investigation

- The Company will investigate the complaint by reviewing the Complaint Form, Warrant Form, the relevant account records, platform data, and/or communications between the Client and the Company.
- The Client shall provide additional information or documents in any case the Company asked for the purpose of assessing and determining the issue and/or issues further.
- Once the Company has assessed the issue and/or issues, the Company may, under its discretion, to give a proportional compensation and/or resolution to the Client and/or notify in case there are no resolution.

15.5. Resolution Timeline

- Standard complaints shall be resolved within thirty (30) Business Days.
- Complex cases may take up to ninety (90) Business Days or more, in which case the Client will be informed of the delay and updated regularly.

15.6. Trading With Guarantee

In the event of complaints related to:

- Server freeze resulting in emergency close,
- Abnormal spread widening that causes TP/SL to be missed or triggered incorrectly,
- Slippage resulting in materially different execution prices,

The Client may file a complaint via the Warranty Form. Once validated, compensation will be processed within a maximum of 2 × 24 Trading Hours.

15.7. Escalation

In any case where the Client is not satisfied with the compensation or resolution given by the Company related to their complaint, the Client may attempt to settle their dispute through the mechanism as stipulated under Article 17.

15.8. Final Decision

All decisions made by the Company's Compliance Department shall be communicated to the Client in writing.

16. Events of Default

16.1. In any event where an event of default occurred, including but not limited to one/or more of the following reason:

- a. The failure of the Client to fulfill and/or provide any initial margin and/or hedged margin, or other required amount;
- b. If a Client is involved in a legal issue or is sued by an external party (including but not limited to Civil, Bankruptcy, and/or other matters) subject to the Law of Seychelles and/or any equivalent applicable law in other jurisdiction;
- c. The Client failed to perform its representation and warranties subject to this Agreement and/or other agreement that are entered upon signing up to ORBI TRADE;
- d. The Client is declared absent for long term, proven to be legally and mentally incapable, and/or dies;
- e. The Client's source of deposits are illegal due to money laundering, terrorism, fraudulence, and/or other violation to the applicable law;
- f. Other circumstances rendering the Company's necessity to terminate the account.

16.2. ORBI TRADE reserves the right to terminate or close the Client's account, temporarily or permanently, and/or the right to unilaterally terminate the Client Relationship with ORBI TRADE. In cases of specific Events of Defaults, ORBI TRADE take actions until a final and legally binding and enforceable Court Decision.

17. Governing Law & Dispute Resolution

17.1. This Agreement shall be governed by and construed in accordance with the laws of Republic of Seychelles.

- 17.2. Any disputes arising out of or in connection with this Agreement shall be resolved amicably through negotiation or mediation.
- 17.3. In any case where the dispute cannot be settled amicably, the Client and the Company have agreed to finally settle their dispute through arbitration in the International Chamber of Commerce under the Rules of International Chamber of Commerce, the seat of arbitration is Wien, the language of arbitration is English, and the numbers of arbitrator is 3 (three) appointed in accordance with the applicable laws and regulations.

18. Miscellaneous

- 18.1. The Company may amend, update, or revise this Agreement at any time by posting the revised version on its official website and/or notifying the Client by email.
- 18.2. In the event of discrepancies between different language versions of this Agreement, the English version shall prevail.
- 18.3. Electronic documents, emails, and digital signatures shall be considered valid and legally binding

Part 4: ORBI TRADE ADVENTAGE

Welcome to ORBI TRADE!

ORBI Trade is a Seychelles-based CFD (Contract for Difference) broker offering Direct Market Access (DMA) to global exchanges. We connect Clients directly to international financial markets, providing real-time price feeds for Forex, Gold, Silver, Oil, and Cryptocurrency instruments.

At ORBI TRADE, every trade is protected under our Trading Guarantee System. We provide compensation for a wide range of issues, including:

- Slippage: Any slippage resulting in reduced profits will be compensated based on the difference between the expected and actual outcomes.
- Spread Anomalies: Unexpected widening of spreads that causes positions to be executed prematurely—or fail to be executed—will also be covered.
- Misquotations, transaction delays, or system errors: All such disruptions are eligible for compensation.

All claims must be supported by valid evidence and submitted via the Warranty Form, which is accessible through the Member Area and our mobile application. Every incident is documented in your personal trading journal as proof of transparency and accountability.

We also provide access to FOREXFLIX, our comprehensive e-learning platform, along with free daily trading signals—available through our interactive membership portal and mobile app.

Supported by major global liquidity providers, ORBI Trade delivers ultra-fast execution speeds—comparable to demo environments—in as little as 100 microseconds. Our DMA-CFD model ensures institutional-level pricing and transparent execution.

Clients benefit from competitive flat-rate commissions, Sharia-compliant swap-free accounts, and seamless fund transfers. Deposits and withdrawals are processed in under 59 minutes through partnerships with international banking institutions.

Experience fair, fast, and guaranteed trading—only at ORBI Trade.

Only at ORBI TRADE — Trade Quietly, Quickly, and Completely!

Why choose ORBI Trade for your trading needs? Here are seven compelling reasons:

- **Secure Trading Environment**
ORBI Trade ensures a stable and secure trading experience with consistent spreads and a robust system that eliminates execution errors.
- **Ultra-Fast Execution**
Trade with no requotes and lightning-fast execution speeds. Our deposit and withdrawal processes are also among the fastest in the industry—completed in under 59 minutes.
- **Complete and Diverse Trading Instruments**
At ORBI Trade, everything you need is in one place. You can trade forex, U.S. stocks, commodities, gold, oil, crypto, and more—all from a single platform. Truly complete!
- **Trusted Analysis & Free Signals**
Get access to over five daily trading signals and market roadmaps provided by our experienced in-house analysts—at no additional cost.
- **Extensive Educational Support**
ORBI Trade delivers structured education programs with a minimum of 60 sessions per year, including live trading workshops, to help you trade more confidently and effectively.
- **Join the Largest Trader Community**
When you trade with ORBI, you're not trading alone. You'll become part of the largest and most active trader community, where traders connect, collaborate, and grow together. Contact us at +62 8111 717 999 to get your invite link.

- **Engaging Events & Competitions**

Participate in regular trading competitions, exclusive events, and signal-copying programs designed to enhance your skills and trading performance.

DMA & CFD Trading with ORBI TRADE

Direct Market Access (DMA) & Contract for Difference (CFD)

ORBI TRADE offers trading through a true DMA & CFD model, where all orders are sent directly to the market or liquidity providers—ensuring tighter spreads, faster execution, and no requotes. This structure allows traders to benefit from real-time market pricing and institutional-grade execution quality.

1-Second Execution During Major News Events

ORBI TRADE is the only broker in the world offering real-time execution speeds as fast as 1 second, even during high-impact economic releases such as the Non-Farm Payroll (NFP) and other major news events—giving traders a significant edge in volatile conditions.

59-Minute Deposit and Withdrawal Guarantee

We guarantee that both deposit and profit withdrawal requests will be processed within 59 minutes, provided that all submitted data is complete and accurate. Requests can be made daily (Monday to Sunday) between 03:00 – 16:00 (GMT +2) , in line with online banking operation hours.

Fully Automated Order Execution

All trade orders at ORBI TRADE are executed automatically and routed directly to liquidity providers—without any intervention from a Dealing Desk—ensuring full transparency, speed, and fairness in every market condition.

Part 5: ORBI TRADE — The Only Broker in the World That Offers a Trading Guarantee

ORBI TRADE is proud to be the only broker globally that offers a formal guarantee system. In the event of slippage, abnormal spread widening, or system-related issues such as price freezes or misquotations, affected traders are eligible to receive direct compensation.

We are committed to ensuring a safe and reliable trading environment, supported by the following key features:

- **100% Consistent Spreads**
ORBI Trade monitors spread consistency across all instruments. If abnormal or inconsistent spreads are detected, we will manually verify your trade journal to ensure fairness and accuracy in your transactions.
- **Superfast Execution Without Requotes**
Trade confidently without interruptions. If slippage exceeds the maximum allowable spread, any losses incurred as a result will be compensated accordingly.
- **Deposits & Withdrawals Processed in Under 1 Hour**
We guarantee that your deposit and withdrawal requests will be processed within 59 minutes—as long as your submitted data is complete and valid. If your transaction is not completed within this timeframe, please contact us immediately, and we will prioritize its processing within the next five minutes. Request windows are open daily (Monday to Sunday) from 03:00 to 16:00 (GMT+2), in accordance with online banking hours.

WHAT IS COVERED UNDER THE ORBI TRADE GUARANTEE?

ORBI Trade offers a unique and transparent Trading Guarantee System, designed to protect traders from unexpected technical and market-related disruptions. Here's what is covered:

1. PRICE SLIPPAGE

Definition:

Slippage occurs when an order is executed at a price different from the requested price. This difference arises due to rapid market fluctuations between the time an order is placed and the time it is executed—especially during high volatility, such as major news releases or economic data announcements.

Important Note:

This guarantee does not apply to slippage caused by price gaps—i.e., when a visible gap appears on the chart between the requested price and the executed price. Compensation is only applicable if no gap is observed on the chart, and the price difference exceeds the allowable slippage range for the trading pair.

ORBI Trade's Commitment:

If slippage exceeds the predefined limit (not caused by a gap), the resulting difference in profit will be compensated and returned to you in USD.

Possible Impacts:

- Orders executed at prices significantly different from the requested price, without any visible gap on the chart.

2. ABNORMAL SPREAD WIDENING**Definition:**

Bid and ask prices are sourced from liquidity providers. During certain conditions—such as major news releases, market openings or closings, low liquidity periods, or volatility—spreads may widen abnormally.

Note:

Exotic pairs (non-USD base pairs) are more prone to spread widening, particularly during the transition between the New York and Asian sessions. Spreads may reach up to 30–60 pips. It is advisable to avoid holding overnight positions in these pairs to mitigate stop-loss risks.

ORBI Trade's Commitment:

If spread widening exceeds the specified limit for a pair, ORBI Trade will compensate the difference in profit and credit the amount in USD.

Possible Impacts:

- Pending Orders or Stop Losses executed at prices not visible on the chart.
- Pending Orders or Take Profits not executed despite price reaching the expected level.

3. SYSTEM ERROR**Definition:**

In rare situations, technical issues or force majeure conditions—such as server outages, price freezes, login failures, and/or other similar occurrences—may prevent traders from managing their positions properly. These situations can disrupt trading activities temporarily, especially during high market volatility or platform maintenance.

HOW TO CLAIM YOUR GUARANTEE

Compensation claims must be submitted with valid proof via the **Warranty Form**, available in the **Member Area** or **Mobile App**. For full details on how compensation is calculated and processed, please refer to the "**ORBI Trade Warranty Algorithm**" document.

All clients are required to read and understand this document to ensure a better and more secure trading experience.

Additionally, in cases of system freeze, error, orders that cannot be closed and/or other technical issues—such as inability to log in or price feed stops—clients may request an Emergency Close by:

- Contacting our team via Client Care or Trading Coach via **Whatsapp**; and
- Submitting valid evidence (such as a **trading journal screenshot** or a **screen recording/video**) that shows an attempt to close the position during the freeze/error period.

Possible Impacts:

- Unable to access the MT5 account;
- Unable to close floating positions due to platform freeze.

Important Note:

Emergency Close requests will only be accepted if they are reported during the freeze/error period. Reports submitted after the system has returned to normal operation may not be eligible for processing.

WHAT IS NOT COVERED UNDER THE ORBI TRADE TRADING GUARANTEE

While ORBI TRADE is committed to providing strong protection for traders through our warranty system, there are specific conditions and trading behaviors that fall outside the scope of the guarantee:

1. GAP Trading Visible on Chart

GAP trading refers to a market condition where there is a visible price gap on the chart, indicating no transactions occurred within that price range. These gaps are a natural part of market behavior, particularly during opening sessions or after major news events.

For more details, please refer to Point 20 of the GAP Trading Explanation.

2. Trades Executed Around Market Close/Open

Warranty claims will not be accepted for transactions executed within the following time frames:

- Two hours before market closing, and
- Two hours after market opening

During these periods, price movements are often highly unstable due to low liquidity. Any trades placed during these windows are considered high-risk decisions made at the trader's own discretion, and the Company shall not be held responsible for the outcomes.

3. Stop Out Due to Full Margin Usage

Transactions that result in Stop Out or Margin Call due to excessive leverage or full margin usage are not eligible for warranty.

Example:

- Leverage: 1:1000
- Margin for 1 lot XAUUSD: \$100
- Volatile market spread: ~85 pips (0.85 points)
- Bid-Ask: 2560.00 – 2560.85
- Resulting floating loss: -\$85
- Remaining balance: \$15 → Margin level: 15%

Since the margin level falls below 30%, the position will be automatically stopped out. This scenario is not covered under the warranty, as it reflects a risk management issue on the trader's side.

4. High-Risk Hedging Positions

Hedging or locking involves placing two opposing positions (buy/sell) on the same pair. While commonly used as a strategy, it carries significant risk.

Please note:

Pending Order Hedging using Buy Stop/limit and Sell Stop/limit orders or Market Execution within 1 hour before or after a major news release is not covered by the warranty system, regardless of whether one of the orders is later cancelled.

This includes any strategy involving simultaneous placement of Buy Stop and Sell Stop orders (or a combination of one pending order and one market execution) intended to capture price movement during high-impact news events.

The types of Pending Order hedging positions that are not covered under this warranty include:

- Pending Order hedging positions that remain active within the 1-hour period before and up to 1-hour after the major news release;

- Orders that were placed prior to that time but remain active during the 1-hour period before and after the major news release; and
- Hedging positions in which one or both pending orders were later canceled.

We strongly advise traders to plan ahead and avoid high-risk strategies during sensitive time windows.

5. Slippage or Spread Widening Within Acceptable Limits

Slippage or spread widening that remains within the maximum allowable threshold per instrument is considered a normal part of market behavior and is not covered under the warranty system.

Please note:

The maximum spread limits differ between normal market conditions and high-impact news events.

You may refer to the official Trading Warranty Policy ORBI TRADE for the full table of reference values per instrument.

Part 6: TRADING REQUIREMENT

1. TRADE SIZE

Trading instruments are offered in different sizes, starting from micro account size (0.01 LOT). For instance:

- a) In micro-lots (0.01 LOT)
- b) In mini-lots (0.1 LOT)
- c) In standard-lots (1 LOT)

2. MARGIN DEPOSIT

To open a real account at ORBI TRADE, a deposit is required. The minimum deposit for each ORBI TRADE Trading Account differs based on the type of account enrolled by the Client upon signing up to ORBI TRADE, as follows:

- a) \$50 for Recreation account
- b) \$1,000 for Professional account
- c) \$2,500 for Sharia account
- d) \$35,000 for the Signature account

Note:

In any event that there are changes in the margin deposit for any account type in ORBI TRADE, the Client shall see the related changes through the website.

3. BID / ASK SPREADS

The bid and ask prices of trading instruments on the ORBI TRADE platform are determined by liquidity providers, and may fluctuate depending on market conditions.

In abnormal market situations—such as before and after the release of major economic data, during periods of heightened volatility, or low liquidity—spreads may widen beyond normal levels. Additionally, bid/ask spreads may be affected by:

- Market opening/closing hours
- The transition between the New York and Asian trading sessions
- Changes in the value date of the trading instrument

Important Notice on Exotic Pairs:

Widening of spreads frequently occurs in Exotic Pairs (currency pairs not against the USD), especially during market open/close. These pairs may experience spreads of 30–60 pips, compared to their usual stable spread range. Therefore, traders are strongly advised to avoid holding overnight positions on exotic pairs, as stop-loss levels may be triggered unexpectedly due to temporary spread widening.

Understanding Spreads & How They Affect Your Trading

The price displayed on your chart is typically the Bid price. However, when setting a Take Profit (TP) or Stop Loss (SL), it's important to factor in the market spread—the difference between the Bid and Ask prices.

Example:

- TP is set at 1.2600 on EUR/USD
- Spread: 2 points (0.0002)

The Ask price must reach 1.2602 for the TP to be triggered.

Likewise, an SL set at 1.2750 would require the Ask price to reach 1.2752 to trigger the stop.

Now, if the spread widens by an additional 10 points, the TP would only be triggered when the Ask price reaches 1.2612, and the SL at 1.2760.

Need Clarification? Contact Us.

If you're unsure how your Take Profit or Stop Loss might be affected by current spread conditions, or you notice irregular price behavior, we strongly recommend reaching out to ORBI TRADE for assistance:

☎ Call (EN): +1 737 232 2299

☎ WhatsApp (ID): +62 8 111 717 999

We're happy to assist you and help verify your trading journal. As for price tick history, you can also review it yourself via MetaTrader 5 (PC version). Here's how:

How to Check Tick History on MetaTrader 5 (PC):

- Go to the Market Watch panel
- Right-click the symbol/pair you want to check, then click Symbols
- Select the pair, then click the Ticks tab
- Choose the time period you want to review
- Click Request

This allows you to see the exact bid/ask movement per tick and verify if spread widening or slippage occurred based on actual price data.

4. ORDER EXECUTIONS

Your MT5 platform offers all standard types of market orders, including market execution, limits, and stops. Additionally, Trailing Stops are available, allowing the Stop level to move in line with the market price, and it is supported for all types of Stop orders.

All stop and limit orders can be placed as follows:

- a) Day Order: This order automatically expires at the end of the working day when it is placed.
- b) Good Till Canceled (GTC): This order remains active until it is manually cancelled.

5. MARKET ORDER EXECUTION

Currently, the primary method used to execute trades via the ORBI TRADE platform is "Market Orders Execution." Market orders are executed at the current available price for a specified amount, but please be aware that this may result in slippage.

In abnormal market conditions, particularly before and after major economic news releases when market conditions are unstable, trading transactions may not be executed at all (off-quote) due to the unavailability of the Automatic Order Fill volume.

6. PENDING ORDER

A Pending Order is a transaction instruction submitted by the Client to be executed automatically when the market price reaches a specified level. The types of Pending Orders include, but are not limited to:

- **Buy Limit:** A buy order placed below the current market price. It is executed when the price falls to a certain level.
- **Sell Limit:** A sell order placed above the current market price. It is executed when the price rises to a certain level.
- **Buy Stop:** A buy order placed above the current market price. It is executed when the price increases to the specified level.
- **Sell Stop:** A sell order placed below the current market price. It is executed when the price drops to the specified level.
- **Buy Stop Limit:** A two-step order to buy above the market price, which first triggers a stop level, then places a limit buy order.
- **Sell Stop Limit:** A two-step order to sell below the market price, which first triggers a stop level, then places a limit sell order.
- **Take Profit (TP):** An exit order set to close a profitable position when the price reaches a predefined level.
- **Stop Loss (SL):** An exit order set to limit losses by closing a position when the price moves against the trader beyond a certain level.

Once the market price reaches or surpasses the specified level, the Pending Order is converted into a Market Order.

Execution Terms Under Price Gap Conditions

In the event of a price gap—defined as a jump in price from one level to another without any transactions in between—the following conditions apply:

- a. Pending Orders (including Buy Stop and Sell Stop) will still be executed, but at the first available market price after the gap, not at the Client's requested price.
- b. ORBI TRADE cannot guarantee that Pending Orders will be executed at the requested price.
- c. If a Take Profit (TP) or Stop Loss (SL) level is located within the gap, the system may execute the Pending Order and immediately close the position simultaneously. This could result in the position being closed at a loss immediately upon execution (instant loss).
- d. These conditions arise due to market volatility and liquidity limitations and are considered part of the inherent market risk.

Important Notes

- All Pending Orders (Buy Limit, Sell Limit, Buy Stop, Sell Stop, Take Profit, and Stop Loss) will be executed at the prevailing market price once triggered.
- For example: If you place a Sell Stop order on the Dow Jones Index at 33,000, and the next available market price is 31,000 due to a gap, your order will be executed at 31,000.
- For CFD US Stocks pairs, all Pending Orders including TP/SL are set with a Good Till Today (GTD) expiration time.

Real Case Example

Sell Side

The following is an example of a Pending Order affected by a price gap:

A Sell Stop order was set at 3293 and 3291, with a Take Profit (TP) level at 3289.

Due to a price gap in the Gold market during the morning session, the Sell Stop order was executed at 3287.48, which was below the TP level.

As a result, the TP was immediately triggered, and the position was closed at a loss, even though the TP was originally set to secure profit. This illustrates how Pending Orders and TP/SL levels can be impacted by sudden market gaps under volatile conditions.

Buy Side

The following is an example of a Buy Stop order affected by a price gap:

A Buy Stop order was placed at 1.2500, with a Take Profit (TP) level set at 1.2550.

Due to a sudden price gap following a news release, the next available price after the gap was 1.2562, which is above the TP level.

As a result, the Buy Stop order was executed at 1.2562, and the TP was immediately triggered, closing the position at a loss, even though the TP was originally intended to secure profit.

This scenario demonstrates how Buy Stop orders and Take Profit levels may be impacted by price gaps—particularly during high market volatility—resulting in instant loss due to execution above the TP level.

7. INTEREST / SWAP

An interest/swap rate is the overnight interest or rollover (earned or paid) for holding positions overnight in Forex trading. Each trading instrument has its swap fee, which is calculated based on the volume used.

The interest/swap rate is subject to change depending on fluctuations in the country's primary interest rate and is calculated daily at the close of the New York market. Additionally, there is an additional swap of three times the average amount, which occurs every Wednesday to compensate for the swap fees on Saturdays and Sundays when the market is closed.

8. COMMISSION

A commission will be deducted from your Trading Account instantly once the Open Order is executed.

9. ADJUST ROLL-OVER

For customers with Free Swap Accounts, there is an Adjust Roll Over Fee. This Roll Over Adjust is a replacement fee for the Swap charged for Free Swap Accounts, and it is only applied to transactions that exist at the end of the month.

So, if there are no open positions from the end of the month to the beginning of the following month, this fee will not be charged. Hence, we recommend that for Free Swap accounts, you avoid holding positions at the end of the month.

(Average Spread x lot) + Commission

Study Case:

Open Sell EURUSD on November 30th at 1.13736 (1 lot)

Open Sell XAUUSD on the same day at 1222.85 (1 lot)

And then close on 01st December. So, Roll Over fee EURUSD :

$$(25 \times 1) + 30 = \$55$$

Roll Over fee XAUUSD :

$$(30 \times 1) + 30 = \$60$$

Standard Operating Procedure (SOP) for Debiting Adjust Roll Over

- a) The Adjust Roll Over fee will be deducted from your Free Margin at the end of the month, at the market close.
- b) If the funds available in Free Margin are insufficient, we will contact you to top up the required amount of funds.
- c) The top-up process takes up to 5-7 trading days.
- d) If you do not top up within that time period, the floating positions will be closed one by one (First in, First Out) until the funds available in your Free Margin are sufficient to cover the Adjust Roll Over fee.

NOTE: *Calculations may vary depending on market conditions and average spreads.*

10. LEVERAGE

The Forex market's main benefit is offering the highest leverage (lowest margin) among various financial products. This allows all traders to participate in the global market, which may not be possible in other financial worlds.

All accounts in Orbi Trade have a leverage of 1:200.

11. MARGIN REQUIREMENT

The Client is required to deposit and maintain the Initial Margin and/or Hedged Margin as determined by the Company at the time a position is opened. The Client must, at all times, maintain sufficient balances in their account to meet the applicable Margin Requirements, without any prior notice or demand from the Company.

It is the Client's responsibility to understand how margin is calculated and to ensure that their account contains adequate balance to meet ongoing margin obligations.

Margin Adjustments

The Company, in accordance with applicable regulations, reserves the right to increase or decrease margin requirements—for any Client, on any open or new position—at its sole discretion, without prior notice.

Margin adjustments may be made immediately if the Company deems it necessary or appropriate, including but not limited to the following circumstances:

- a) An Event of Default occurs;
- b) There is a change in the relevant market or general financial conditions;
- c) Upcoming economic releases or market-moving news are expected;
- d) The Client changes their trading pattern in a way that increases risk exposure to the Company or any affiliated entity;
- e) The Client's exposure is overly concentrated in a specific currency pair or instrument, which may require additional margin to manage associated risk.

Client Responsibility

It is the Client's sole responsibility to monitor their account balance and ensure that there is sufficient balance at all times to meet Margin Requirements. The Company may:

- Reject any order if the account lacks sufficient margin;
- Delay the processing of any order while determining the account's margin status.

Margin Calculation by Instrument

The margin required to open or maintain a position may differ depending on the instrument class. Below is the formula for each:

- Forex & Metals
Margin = (Initial Margin or Maintenance Margin or Hedge Margin) × Lot ÷ Leverage
- Indices, CLU (Crude Oil Futures), & Cryptocurrencies
Margin = (Initial Margin or Maintenance Margin or Hedge Margin) × Lot
- Commodities
Margin = (Initial Margin × Lot) ÷ Leverage

Definitions:

- Initial Margin: The minimum required funds to open a position.
- Maintenance Margin: The minimum required funds to maintain an open position.
- Hedge Margin: The minimum required funds to lock an opposite position (hedging).

12. Initial Margin Before, During, and After Major News Releases (Dynamic Margin)

Please Note: To manage risk during periods of high market volatility, the Initial Margin Requirement to open a new position will be increased by three times (3x) during a specific window surrounding major news events.

This applies to the period:

- 1 hour before the release of a major economic news announcement,
- until 1 hour after the news release.

However, please note that the margin requirement to maintain existing positions remains unchanged.

Example:

- Under normal conditions, opening or maintaining 1 Lot XAUUSD with 1:200 leverage requires a Free Margin of \$500.
- Under the Dynamic Margin Rule, if a trader wishes to open a new position within the restricted 2-hour window (1 hour before and 1 hour after the news), the required Free Margin increases to \$1,500.
- Once the position is opened, the margin to maintain the position reverts to \$500 and is not affected by the rule.

Purpose of This Rule

This system is designed to protect both Clients and the Company from excessive risk during periods of extreme market volatility. By requiring a larger Free Margin for new positions during high-impact news releases, the Company helps reduce the likelihood of forced liquidations and uncontrolled slippage.

This rule:

- Applies only to new positions opened during the specified timeframe;
- Does not affect existing open positions, including those placed well before the news period.

List of Major News Events Covered by This Rule:

No	News
1	FOMC
2	JOLTs Job Openings
3	GDP
4	Initial Jobless Claims
5	PPI
6	CPI
7	S&P Global US Manufacturing PMI
8	ISM Non-Manufacturing PMI
9	NFP
10	Core Retail Sales
11	ISM Manufacturing PMI
12	Crude Oil Inventories
13	Fed Chair Powell Speaks
14	Existing Home Sales

Notes: The above list of news events may be updated in the future if additional events are identified as having a significant market impact.

13. HEDGING

Hedging, also known as Locking, refers to the practice of opening two opposite trading positions (Buy and Sell) on the same currency pair or instrument. When a hedge position is active, the margin requirement is reduced to reflect the lower market risk. Specifically, the margin requirement for each leg of the hedge is calculated at 50% of the standard margin requirement.

Example:

- You open a Buy (Long) position of 0.1 lot EUR/JPY
- At the same time, you open a Sell (Short) position of 0.1 lot EUR/JPY

Under normal conditions, the total margin requirement might be \$100, but in a hedged scenario, the combined margin requirement is reduced to \$50.

Important Warnings – BE AWARE:

While hedging may reduce initial margin requirements, it also carries significant risk, especially during volatile market conditions. Please take note of the following:

- Spread widening during high volatility (e.g., news events) can cause one leg of the hedge to incur increasing losses, while the opposite position may not provide enough equity to offset it.
- This imbalance may lead to a Stop Out if your equity falls below the minimum margin level.

Warranty Exclusion:

Pending Order Hedging using Buy Stop/limit and Sell Stop/limit orders or Market Execution within 1 hour before or after a major news release is not covered by the warranty system, regardless of whether one of the orders is later canceled.

This includes any strategy involving simultaneous placement of Buy Stop and Sell Stop orders (or a combination of one pending order and one market execution) intended to capture price movement during high-impact news events.

The types of Pending Order hedging positions that are not covered under this warranty include:

- Pending Order hedging positions that remain active within the 1-hour period before and up to 1-hour after the major news release;
- Orders that were placed prior to that time but remain active during the 1-hour period before and after the major news release; and
- Hedging positions in which one or both pending orders were later canceled.

Traders are advised to carefully evaluate risk exposure and avoid using hedging strategies during periods of heightened market volatility unless fully aware of the potential consequences.

14. MARGIN CALL

Metatrader5 will trigger a margin call when the margin level on the account reaches 100%. Margin levels can be found in the Trade tab menu in Metatrader5.

15. STOP OUT (AUTO-CUT) LEVEL

Whenever the margin level reaches 30%, Metatrader5 will automatically partially close all trade positions to avoid more significant losses.

If at any time the Equity falls below a 30% Margin Levels of the Necessary Margin, the Company has the right to close any, or all of the Client's Open Positions without the Client's consent or any prior Written Notice to him.

16. ROUTINE MAINTENANCE

To ensure your trading convenience, regular maintenance for the system running on Metatrader 5 will be conducted on the following schedule:

Monday to Saturday

 23:55 – 00:05 GMT+2 (Meta Time) / 04:55 – 05:05 GMT+7 (WIB)

Sunday Maintenance Window

 23:55 – 00:05 GMT+2 (Meta Time) / 04:55 – 05:05 GMT+7 (WIB)

 03:00 – 05:00 GMT+2 (Meta Time) / 08:00 – 10:00 GMT+7 (WIB)

Important Note:

During Sunday maintenance, there will be a temporary suspension of Cryptocurrency trading. Crypto instruments will be unavailable for trading during this period. Clients are advised to monitor their positions accordingly and avoid placing or modifying trades involving cryptocurrencies during the stated maintenance times.

17. DORMANT ACCOUNT

Accounts that have remained unused for the past 180 days will be considered dormant and can no longer be used for trading and/or transaction purposes.

18. PROHIBITED TRADING & ABUSIVE TRADING PRACTICES

18.1 Definition of Prohibited Trading

The Client acknowledges and agrees that the following trading activities are strictly prohibited and shall be deemed as Prohibited Trading and/or Abusive Trading Practices, including but not limited to:

- a) Arbitrage Trading, including price arbitrage, latency arbitrage, execution arbitrage, or any other form of exploiting price discrepancies or execution delays;
- b) Picking / Sniping, latency abuse, or any trading activity designed to exploit system delays, liquidity provider latency, or execution timing advantages;
- c) Cashback Arbitrage, bonus abuse, rebate abuse, or any trading strategy intended to generate profits primarily from promotional benefits rather than genuine market exposure;

- d) Riskless or Near-Riskless Trading Strategies, including but not limited to opening opposite positions (buy/sell) simultaneously or sequentially, whether within the same account or across multiple accounts, with the primary objective of eliminating or minimizing market risk;
- e) Abusive Hedging Strategies, including opening opposing positions during periods of high market volatility, major news announcements, market open/close sessions, price gaps, or when the underlying instrument is suspended or restricted;
- f) Abusive Use of Automated Trading Systems or Expert Advisors (EA), including any algorithmic or automated strategy designed to exploit system behavior, pricing anomalies, execution mechanics, or liquidity conditions;
- g) Trading During Abnormal Market Conditions with the intention to exploit volatility, including but not limited to trading during major news releases, market gaps, illiquid market conditions, or extraordinary market events;
- h) Multi-Account Abuse, including coordinating trades between the Client's own accounts or with third-party accounts, whether directly or indirectly, to gain unfair trading advantages or riskless profits;
- i) Any other trading activity which, in the sole determination of the Company, constitutes fraud, manipulation, abuse, exploitation, deceitful conduct, or unfair trading practices.

18.2 Company Rights, Trading Limitations, and Discretion

The Client expressly acknowledges and agrees that where the Company has any indication, reasonable suspicion, or evidence of Prohibited Trading, Abusive Trading Practices, fraud, manipulation, or any form of exploitative or deceitful activity connected to a Trading Account, the Company reserves the right, at its sole and absolute discretion, and without prior notice to the Client, to impose trading limitations and/or take one or more of the following actions:

- a) Limit, restrict, or cap the Client's trading activities, including but not limited to:
 - maximum lot size per trade;
 - maximum total trading volume;
 - maximum number of open or pending orders;
 - maximum frequency of order placement;
 - restriction to specific instruments or trading sessions;
- b) Close, suspend, restrict, or terminate any Trading Account(s) held by the Client with the Company, either temporarily or permanently;
- c) Void, cancel, or remove any trading bonuses, rebates, cashback, promotional credits, or incentives previously credited to the Client's Trading Account(s);
- d) Void, cancel, or reverse any transactions carried out, including but not limited to open positions, closed trades, pending orders, and any resulting profits or losses;

- e) Conduct an investigation on the Client's Trading Account(s) for an indefinite period of time, during which trading, deposits, withdrawals, or other account activities may be restricted;
- f) Charge a penalty fee to the Client, equal to or greater than the amount of profit or benefit obtained from the Prohibited Trading activities;
- g) Confiscate any profits generated from Prohibited Trading practices and, at the Company's discretion, return only the original deposited funds to the Client;
- h) In cases where profits arising from Prohibited Trading have already been withdrawn, confiscate such profits from any other related or associated accounts held by the Client in order to recover the equivalent amount.

18.3 Non-Circumvention

The Client agrees not to attempt to bypass, evade, or circumvent any trading limitation, restriction, or control imposed by the Company, whether through the use of multiple accounts, third-party accounts, automated systems, or any other means. Any such attempt shall be considered a material breach of these Trading Rules.

18.4 Finality of Decision

All determinations made by the Company regarding Prohibited Trading, Abusive Trading Practices, and the imposition of any trading limitations shall be final, binding, and conclusive. The Client hereby waives any right to dispute, challenge, or claim compensation for any actions taken by the Company pursuant to this Article, except as required by applicable law.

18.5 No Liability

The Company shall not be liable for any direct, indirect, incidental, consequential, or special losses, including loss of profits or trading opportunities, arising from any actions taken under this Article in connection with Prohibited Trading, Abusive Trading Practices, or trading limitations.

19. SCALPING TRADING POLICY

To ensure fair trading and maintain system performance, ORBI TRADE implements specific limitations on high-frequency trading activities, particularly those associated with scalping strategies.

Scalping Limitations:

Each account is permitted to execute a maximum of 4 orders—whether opening or closing positions—within any 30-second time window.

How This Affects Your Transactions:

a) Market Execution Orders

If you submit more than 4 Market Execution orders within a 30-second interval, any attempt to open additional positions will be rejected until the time window resets.

b) Pending Orders

If you place multiple Pending Orders (e.g., Buy Stop or Sell Stop) at the same price level or within close proximity, only 4 orders will be executed.

Any excess orders beyond the 4-limit threshold will be automatically canceled by the system.

Important Notes:

- These rules are enforced per account, not per instrument or per direction.
- The system applies the limit automatically to prevent excessive scalping activities that may impact platform stability or execution fairness.
- Traders are advised to structure their entry strategies accordingly and avoid placing high-frequency orders within short intervals.

20. GAP TRADING

During high-impact news events (e.g., Non-Farm Payroll), prices can move in rapid ticks—causing execution at unexpected levels.

With ORBI TRADE's Straight Through Processing (STP) system, all orders are routed directly to the Liquidity Provider and executed at the best available market price, similar to real-time exchange behavior (such as on the Indonesian Stock Exchange), and without requotes. However, execution must follow market prices, not the requested levels.

Execution Example: Buy Side (BUY STOP Affected by Gap)

- You place a BUY STOP order for Gold at 1270
- At the time of order placement, the market price is 1260
- A few minutes later, the price gaps up and jumps directly to 1275

Since there were no trades between 1270 and 1275, your order is executed at the first available price of 1275, not at 1270.

If you had placed a Take Profit (TP) at 1275, it would be immediately triggered, potentially resulting in:

- Zero gain, or
- A loss after spread and slippage, despite the intended TP level.

Execution Example: Sell Side (SELL STOP Affected by Gap)

- You place a SELL STOP order for Gold at 1270
- The market price at the time is 1280
- Due to volatility, the next available price is 1265, skipping 1270 entirely

Your order is then executed at 1265, and if a TP was placed at 1267, the trade would be instantly closed at a loss, even though TP was set for profit.

Applies to All Order Types

Gaps can affect various types of orders:

- Buy Limit
- Sell Limit
- Buy Stop
- Sell Stop
- Take Profit (TP)
- Stop Loss (SL)

Execution during gaps may occur at a price that does not appear on the chart, as liquidity may not exist at the requested level.

Risk Management Reminder

Market gaps can be a double-edged sword—resulting in either unexpected profits or immediate losses. As such, all traders are strongly advised to:

- Implement strict Money & Risk Management practices
- Avoid holding high-risk positions ahead of news releases
- Set realistic SL/TP levels with allowance for volatility
- Stay updated with the economic calendar to anticipate possible gaps

Trading responsibly during volatile periods is essential to becoming a consistently profitable trader.

21. LOT FLOATING POSITION

To promote disciplined trading and minimize the risk of overexposure, the Company enforces a strict limitation on floating positions as follows:

- The maximum total floating position per trader account is limited to 20 lots, regardless of the number of instruments traded.
- The maximum floating position per instrument (pair) is limited to 10 lots per trader.

This policy is implemented to prevent overtrading behavior and to protect clients from potential excessive losses that may result from holding oversized positions relative to their account balance.

Traders are advised to manage their exposure accordingly and ensure compliance with this rule. The Company reserves the right to reject new order placements or partially execute trades if the lot limitations are exceeded.

22. EXPERT ADVISOR (EA) USAGE REGULATIONS

The use of Expert Advisors (EA) on the Orbi Trade platform is not permitted during the 5 hours before or after high-impact news or events. This is because the entire warranty validation process is still manually conducted by our team to ensure optimal service quality. This policy aims to prioritize all clients who require warranty claims quickly and fairly.

Reasons for EA Usage Limitations: It has been observed that during volatile market conditions, especially during periods of high-impact news or events, there is an increase in cases of EA errors caused by the devices themselves rather than the brokerage system. Because this can disrupt the trading experience of other clients and hinder the warranty claim process, this limitation policy is necessary.

Adjustment of EA Usage: Users can resume using their EA once the market conditions return to neutral and stable. Users are expected to understand that this policy aims to protect the interests and trading experience of all clients.

Violation Sanctions: Violation of this policy may result in sanctions, including access restrictions (Trading Reject) or account suspension. We expect cooperation from all users to adhere to these regulations for the common interest and better trading convenience.

We appreciate the understanding and cooperation of all users in maintaining the integrity and service quality of trading on the Orbi Trade platform.

23. LIST OF MAJOR NEWS

The following is the list of its major news:

No	News	Currency
1	ISM Manufacturing PMI	USD
2	JOLTS Job Openings	USD
3	FOMC Meeting Minutes	USD
4	German Prelim CPI	EUR
5	Non-Farm Payroll	USD
6	ADP Non-Farm Employment Change	USD
7	Unemployment Claims	USD
8	Average Hourly Earnings	USD
9	Unemployment Rate	USD
10	Initial Jobless Claims	USD
11	BOE Gov Bailey Speaks	GBP
12	Core CPI	USD
13	GDP	USD
14	Core PPI	GBP
15	Claimant Count Change	GBP
16	Empire State Manufacturing Index	USD
17	Core Retail Sales m/m	USD
18	Prelim UoM Consumer Sentiment	USD
19	French Flash Manufacturing PMI	EUR
20	French Flash Services PMI	EUR
21	German Flash Manufacturing	EUR
22	Flash Manufacturing PMI	GBP
23	Main Refinancing Rate	EUR
24	Monetary Policy Statement	EUR
25	Advance GDP	USD
26	ECB Press Conference	EUR
27	Core PCE Price Index	USD
28	CB Consumer Confidence	USD
29	Federal Funds Rate	USD

24. CONTINUOUS CONTRACTS

Product Index Rolling Contracts:

- NQ100 (US100): Nasdaq
- DJ30 (US30): Dow Jones
- SP500 (US500): S&P 500
- CLU : OIL

Effective Date:

- US Indices (NQ100, DJ30, SP500): Active from December 20, 2024 (After Closing Market on December 19, 2024)
- CLU OIL: Active from January 21, 2025 (After Closing Market on January 20, 2025)

Starting from the effective dates, these products will use rolling contracts (Continuous Contracts). When the contract expires, positions do not need to be closed. They can remain floating to the next contract, subject to additional commission fees and Adjust Rollover fees.

Additional Fees and Adjustments:

- Additional Commission Fee: A commission fee will be charged based on the lot size during the rollover process.
- Adjust Rollover Fee: Ensures Profit & Loss (P&L) is adjusted to match the new contract pricing. The adjustment can be positive or negative depending on the position and market price changes.

Example:

Scenario:

A trader holds a Sell position on US100 with 0.1 lots at an old price of 21,737.00 , resulting in a P&L of -3004. At the time of rollover, the new contract price is 21,361.50 resulting in a new P&L of -2796.

Commission charged: -\$3 (based on lot size).

Calculation:

Adjust Rollover = Old P&L - New P&L – Commission

Adjust Rollover = -3004 - (-2796) - 3 = -211 USD.

Result: The trader's position remains open, with an adjust rollover fee of -211 USD applied to the account. The P&L calculation continues based on the new contract price.

Before the contract transitions, clients will be able to view reference new contract prices that may apply. This allows clients to prepare adequate margins to mitigate potential price changes affecting the Profit & Loss of floating transactions. In the event of a Stopout caused by price changes due to contract rolling, this is considered a trading risk that clients must bear.

Therefore, we encourage you to prepare your margin and manage your trading finances carefully.

25. QUOTE TIME AND TRADE TIME

For all transactions executed through the Company's electronic trading platforms, "Quote Time" refers to the precise moment when the indicative market price is received from liquidity providers, whereas "Trade Execution Time" refers to the timestamp when the order is actually executed and confirmed by the Company's trading server.

The Company shall not be held liable for the Client's unawareness of this matter.

If the price of a Pending Order, including Stop Loss (SL) and Take Profit (TP), occurs during the Quote Time while the Trade Time has not yet started, such Pending Orders (including SL/TP) will not be executed at that moment. Pending Orders, including SL/TP, will be executed on the next available tick once the Trade Time becomes active.

Part 7: SETTLEMENT REQUIREMENT

1. Deposits & Withdrawals Policy

By trading with ORBI TRADE, the Client hereby agrees and acknowledge that the Indonesian Bank Accounts and USDT E-Wallets provided by ORBI TRADE are to be used solely as Transit Accounts. These accounts are not intended for long-term storage, main holding, or escrow accounts, nor do they accrue interest or benefits. These transit accounts serve only as intermediary channels for deposit and withdrawal processing purposes relating to trading, and funds should not be considered stored, saved, or managed long-term in these accounts. Therefore, ORBI TRADE bears no responsibility for any misuse or prolonged storage or funds in the transit accounts beyond their functions.

The Client can deposit funds of Margin Deposit to guarantee Account Opening and Additional Margin to **the official Transit Accounts, as follows:**

- **Bank Central Asia (BCA)**
Account Name: PT. ORBI TRADE PLATINUM
Account Number: 0827993399

- **Bank Mandiri**
Account Name: PT. ORBI TRADE PLATINUM
Account Number: 1190009703297
- **Bank Rakyat Indonesia (BRI)**
Account Name: PT. ORBI TRADE PLATIUM
Account Number: 023001004470305
- **Bank Negara Indonesia (BNI)**
Account Name: PT ORBI TRADE PLATINUM
Account Number: 8552222223

ORBI TRADE has implemented a strict policy regarding account deposits and withdrawals, as outlined below:

- a) The bank account data used for deposits or withdrawals must match the information registered in the Investor Management System (IMS).
- b) The deposit or withdrawal process will only be approved if the source or destination account is registered under the same name as the trading account, including a matching ID card and bank account details in the IMS. ORBI TRADE does not receive any deposit for from make a withdrawal for a third party other than the Client.
- c) If a trader makes a deposit or top-up using a bank cash deposit, it is mandatory to confirm the transaction via live chat support, WhatsApp client care, or their assigned trading coach.
- d) Bank account changes can only be processed if the new bank account information exactly matches the details registered in the Investor Management System (IMS). The request must be sent via email using the registered email address in IMS alongside the attachment of personal identification registered in the IMS.

2. Rules for Recipients of Funds from Erroneous Transfers

If a client receives funds from a transfer that are not legally theirs, they must return them. As a penalty, someone who willfully approves funds from a transfer that is not legally theirs may face sanctions that have been determined by the law.

3. Exchange Rate for Deposits and Withdrawals

The Deposit & Withdrawal Exchange Rate refers to a single rate, which is the average USD/IDR value at 03:30 GMT+2 (08:30 WIB) on the relevant day at Bank Central Asia. (For example, if the buying-selling rate on that day is 15,100 - 15,200, the Deposit & Withdrawal Exchange Rate is 15,150).

Please be aware that the exchange rate can change daily, which can affect the value of your Deposit & Withdrawal transactions.

4. Internal Transfer

The Internal Transfer feature is to Transfer Funds between your trading account in ORBI TRADE.

Internal Transfers between your trading accounts can only be done under the following conditions:

- a) Dollar Rates will be the same as the previous account (Fixed or Floating Rate)
- b) Transferred funds will be counted as your Free Margin in a new account
- c) Internal transfer to a new account must meet the minimum deposit requirement for the new account

Notes: Beware of using Internal Transfer with running/floating orders, make sure your margin level still in a good condition to avoid Margin Call.

5. Deposit & Withdrawal Using USDT

By agreeing to the following Trading Rules, the Client confirms that they understand and accept all procedures and policies related to USDT (Tether) deposits and withdrawals at Orbi Trade:

- a) Standard Transfer Requirement
Clients must ensure they send a sufficient amount to cover all network/coin transaction fees.
Only standard transfer methods are accepted. Do not use special functions, contracts, or smart contract types for sending payments.
- b) Payment Initiation
Payments must be made using your personal crypto wallet or exchange platform.
Please copy and paste the wallet address and the exact amount provided by Orbi Trade into your wallet interface.
- c) Blockchain Confirmation
After sending the payment, please check the transaction status via the provided status page.
Once the payment has received the required number of confirmations on the blockchain, it will be marked as completed, and Orbi Trade will be notified.
Confirmation typically takes 10–45 minutes, depending on the network's block time and congestion.
The status page will remain available for 30 days for your reference.
- d) Partial Payment Handling
If you send less than the requested amount, you may send the remaining balance separately.

Orbi Trade will combine the transactions automatically.

Please note that if payment is not completed before the countdown timer reaches 00:00, the deposit request will be automatically canceled by the system.

e) Overpayment Policy

If you send more than the requested amount, only the requested amount will be credited to your trading account.

Any excess funds may be refunded upon request, subject to a refund processing fee of 100 TRX.

f) Source of Withdrawal

Withdrawals can only be requested from available free margin, not tied to any open trading positions.

g) Minimum Withdrawal

Please note that the minimum amount required for withdrawals using USDT is \$50. Withdrawal requests below this amount cannot be processed.

h) Invalid or Incomplete Deposits

Deposits that are underpaid or fail to match the requested amount can be refunded, subject to a 100 TRX refund fee.

If no refund request is made within 30 days, the excess or unclaimed funds will be forfeited and non-recoverable.

i) Refund Processing Time

Refunds will be processed within a maximum of 2 x 24 business hours upon receiving a valid request.

j) ADDITIONAL NOTES: How to Check the Value of 1 TRON (TRX):

Use real-time crypto price tracking sites such as CoinMarketCap, CoinGecko, or Binance. Or, simply type "TRX to IDR" or "TRX to USD" in Google for an instant result. You may also use your preferred exchange platform (Indodax, Tokocrypto, etc.) to check the current TRX price.

For your convenience, please refer to the video tutorials below to guide you through the deposit and withdrawal process using USDT:

- **USDT Deposit Tutorial** : <https://bit.ly/depositflowusdt>
- **USDT Withdrawal Tutorial** : <https://bit.ly/wdflowusingusdt>

Part 8: TRADING INSTRUMENT & DETAILS

1. FOREX

Forex trading involves buying and/or selling one foreign currency against another. The Forex market has a turnover of more than 4 trillion dollars a day and is available for trading almost 24 hours a day.

Contract specification:

PRODUCT	CONTRACT SIZE	LEVERAGE 1:200

Part 9: DISCLOSURE STATEMENT

This Disclosure Statement provides various characteristics and risks involved in conducting the trade of Contract for Differences (CFDs), in accordance with the Securities Act 2007 of Seychelles. Therefore, the Clients warrants that they have read, accepted, and confirmed that they understand the trading risks properly before proceeding with any transactions, as follows:

1. CFDs involves **VERY HIGH RISK** and may not be suitable for everyone. The Client must ensure that they **FULLY UNDERSTAND ALL ASSOCIATED RISKS**, carefully consider their financial circumstances and risk tolerance before trading CFDs.
2. Trading of CFDs may result in **LOSSES EXCEEDING** your initial deposit, as it is highly risky due to the speculative and volatile markets in these products and the leverage (margin) involved. The Client must be prepared to **LOSE ALL FUNDS** during trading.
3. There will be **NO GUARANTEE OF FIXED INCOME** or protection against losses in CFDs.
4. For **BEGINNERS**, it is strongly recommended to thoroughly study the transaction mechanism and complexities of CFDs as it requires special knowledge, understanding, high risk tolerance, and the capability to bear losses if they occur.
5. The Client agrees and acknowledges that All **TRADING TRANSACTIONS MUST BE DONE SOLELY BY THE CLIENT AS THE TRADER** and that they are the only person authorized and permitted to manage the Client Account in respect to entering Transaction Orders. The Trader is **FULLY RESPONSIBLE** for all trading decisions made on their account including all risks arising from these transactions.
6. User IDs and Passwords are **STRICTLY PERSONAL** and **CONFIDENTIAL**. The Client are solely responsible for their use and must not share them with any third parties, including but not limited to ORBI TRADE and/or ORBI TRADE's employees.
7. **CHANGES** in taxation and other laws, government, monetary, and regulatory policies may influence the value of the CFDs, the tax the Client's pay on the CFDs and the total return on the CFDs.
8. ORBI TRADE provides CFDs trading via online services. ORBI TRADE relies on computer software, hardware, and telecommunications infrastructure and networking to provide its services to the Client, which are inherently vulnerable to disruption, delay, or failure. Hence, the Client warrants that they **ACCEPT THE ORBI TRADE SYSTEMS AND SERVICES "AS-IS"** and ORBI TRADE's liability to the Client is limited.

9. The Clients are entitled to receive a **REPORT ON THE TRANSACTIONS** that they have made. The Clients have 1 x 24 hours (Open Position) and 2 x 24 hours (Close position) to request warranty. For transactions that **HAVE BEEN COMPLETED (DONE/SETTLED), THE CLIENT CAN CHECK** through the customer transaction information system to ensure that your transaction has been registered with the Futures Clearing House.

Part 10: DOCUMENTS NOTIFICATION OF RISKS TO BE SUBMITTED BY FUTURES BROKER FOR DERIVATIVE CONTRACT TRANSACTIONS IN CFD TRADING SYSTEMS

This Risk Disclosure Statement is provided in accordance with applicable regulations of the Republic of Seychelles. The purpose of this document is to inform you, as a prospective Client, of the risks associated with trading derivative contracts in a Contract for Differences (CFDs) trading system. By entering into transactions, the Client warrants that the Client have read, understood, and accepted these risks.

1. Trading derivative contracts in CFDs systems carries significant risks, including the potential for losses that exceed your initial margin. This means the Client could lose more money than Client initially invested.
2. CFDs trading involves leverage, which can amplify both profits and losses. Losses can be unlimited and may far exceed your deposited margin.
3. Be cautious of any promises of guaranteed or large profits. While CFDs trading can result in rapid profits, it is uncertain and can also lead to significant losses. No financial product guarantees a “sure profit”.
4. Because of leverage and market volatility, losses can occur very quickly. Profits and losses are credited or debited to the Client’s account daily at the latest. If the market moves against the Client position, the Client may need to deposit additional funds to meet margin requirements. Failure to maintain margin levels may result in forced liquidation of the Client positions at a loss, and the Client will be responsible for any deficit.
5. Liquidating CFDs positions usually requires taking offsetting positions. However, under certain market conditions or technical problems, it may be difficult or impossible to close the Client position. This could prevent Client from realizing profits or stopping further losses.

6. Risk management by opening opposing positions in different contracts or markets may be difficult or unavailable due to market halts or unusual trading activity. This can increase the Client's exposure to loss.
7. System failures at the futures exchange, trading platform, or the Client's futures broker can cause delays or inability to execute trades, increasing the risk of loss.
8. All CFDs derivative contracts carry inherent risks that cannot be completely eliminated by any trading strategy. Strategies involving multiple positions, such as spreads, can carry risks similar to outright long or short positions. Engaging in futures trading requires a good understanding of these products and markets.
9. Day trading in CFDs derivatives involves special risks, including high transaction costs, leverage exposure, and competition with professional traders. Only consider day trading if the Client fully understand these risks and have sufficient experience.
10. Conditional orders like stop-losses may not always limit the Client's losses due to market conditions that prevent order execution. The Client may still incur losses beyond the amount The Client intended to limit.
11. Before trading, carefully read and understand the trust agreement and terms provided by ORBI TRADE.
12. This document does not cover all risks and important details of futures trading. The Client must conduct thorough research and seek professional advice as needed before making any trading decisions.

Part 11: AGREEMENT

*This Agreement represents the entire understanding between the ORBI TRADE and the Client (hereinafter referred to as “**the Parties**”) concerning the subject matter herein and supersedes all prior agreements, understandings, or arrangements, whether written or oral, related to this subject.*

By accessing or using this Agreement and its associated Trading Rules, the Client agrees to monitor email, mailbox, and other communication channels regularly for updates regarding contracts and trading rules. The Client acknowledged and accept that any amendments or notifications communicated through these channels shall take immediate effect and be binding upon Client.

Failure to review or respond to such communications does not exempt Client from compliance with the terms and conditions of this Agreement and any subsequent amendments.

ORBI TRADE shall not be held responsible for any misunderstandings or negligence resulting from Client failure to read or acknowledge notifications.

By agreeing to these terms, Client confirm that Client have read, understood, and accepted all provisions contained in this Agreement.

WHAT WILL GUARANTEED OF?

PRICES SLIPPAGE

The DONE PRICE will be significantly different from the requested price.

Possible Impacts:

- The discrepancy between the expected profit/loss and the actual profit/loss obtained.

WIDENING SPREAD

The difference between bid and ask prices is getting bigger

Possible Impacts:

- Pending Order/SL was done at a price that was not yet shown on the chart
- Pending Order/TP was not done, even though the price has reached the TP price

SYSTEM ERROR

*Prices Freeze
Unable to login Mt5 Account*

Possible Impacts:

- Unable to close the floating position

Don't worry!
If this happens to you, Orbi Trade will compensate for you

Orbipedia:

Normal Spread: The Price Difference that occurs in market conditions with low or normal volatility.

Maximum Spread: The Maximum limit of Spread or Slippage (The price difference between the pending order price and the deal price) that is not guaranteed. If it exceeds the max spread, the difference will be returned in the form of an Adjustment.

Maximum Spread during War: The maximum limit of Spread or Slippage (the price difference between the pending order price and the deal price) that is not guaranteed for transactions executed during War. If it exceeds the max spread, the difference will be returned in the form of an Adjustment.

"Slippage, or the price difference between the pending order price and the deal price, is purely due to real market price movements. However, at Orbi Trade, if you experience slippage in your transaction that exceeds the above limits, you can claim it by contacting our Client Care or your Trading Coach. Because Orbi Trade Trading With Guarantee"

-------------------------	----------------	------------

Difference - Max Spread	Less Than Zero	No Adjustment
-------------------------	----------------	---------------

SERVER DOWN & PRICE FREEZE CASE

Event 44

The freeze of prices can be caused by several factors. If this freeze is due to Orbi Trade's system, then the affected transactions will receive compensation.

Examples of affected transactions include:

You can request an Emergency Close during a system freeze or error by following these steps:

- Chat via WhatsApp: Contact ORBI TRADE Client Care or your Trading Coach with the message: "Close Now"
- MetaTrader Platform Attempt: Attempt to close the position on your MetaTrader platform. The MetaTrader Journal will record this attempt and can be used as evidence.
- Video Recording: Record a video of your attempt to close the position. This can also be used as supporting evidence.

How to Submit Your Claim

Submit all supporting evidence (e.g., MetaTrader Journal screenshots, screen recordings) via the Warranty Form, available in the Member Area or the ORBI TRADE Mobile App.

This ensures that your Emergency Close request is processed efficiently and fairly.

In this case, you will receive compensation by obtaining the closing price calculated as follows:

**After the price stoppage is resolved and the chart returns to normal, the average price on the M1 candle of your Emergency Close will be calculated.*

Example: Emergency Close performed at 14:30 (UTC+2)

- For Buy Entry Position: $(\text{High Price} + \text{Low Price}) / 2 - \text{Maximum Spread}$
- For Sell Entry Position: $(\text{High Price} + \text{Low Price}) / 2 + \text{Maximum Spread}$

Important Note:

Emergency Close requests will only be accepted if they are reported during the freeze/error period. Reports submitted after the system has returned to normal operation may not be eligible for processing.

BURST TIME CASE

Event 45

A Burst Time Case refers to a transaction you wish to execute, but your ticket position is currently being processed in a Warranty Claim.

Possible transactions include:

You want to close your ticket position that is currently in the process of reopening in warranty.

You can request an Emergency Close as follows:

- Screenshot the price on MetaTrader Orbi Trade for the pair you are targeting (ensure this screenshot is relevant, i.e., taken during the period when your ticket is being processed in warranty).
- Send the screenshot as evidence via chat or email to our Client Care or Trading Coach.

In this case, you will receive compensation by obtaining the closing price calculated as follows:

- For Buy Entry Position: Screenshot price - Maximum Spread
- For Sell Entry Position: Screenshot price + Maximum Spread

WHAT IS NOT COVERED UNDER THE ORBI TRADE TRADING GUARANTEE

1. GAP Trading Visible on Chart

GAP trading refers to a market condition where there is a visible price gap on the chart, indicating no transactions occurred within that price range. These gaps are a natural part of market behavior, particularly during opening sessions or after major news events.

For more details, please refer to Point 20 of the GAP Trading Explanation in Trading Rules document.

2. Trades Executed Around Market Close/Open

Warranty claims will not be accepted for transactions executed within the following time frames:

- Two hours before market closing, and
- Two hours after market opening

During these periods, price movements are often highly unstable due to low liquidity. Any trades placed during these windows are considered high-risk decisions made at the trader's own discretion, and the company will not be held responsible for the outcomes.

3. No Warranty for Stop Out Caused by the Use of Full Margin

Example:

Leverage 1:1000

Margin for Entry on XAUUSD 1 Lot = \$100

The spread during market volatility is approximately 85 Pips or 0.85 Points

Example

Bid Price - Ask Price

2560.00 – 2560.85

Thus, if you enter 1 lot, your position will automatically be at \$-85.

So, the remaining funds will be \$15, and the margin level will only be 15%.

This will automatically result in a Margin Call (MC) or Stop Out, as it is less than 30%.

Please note, situations like this are not covered under warranty.

WHAT IS NOT COVERED UNDER THE ORBI TRADE TRADING GUARANTEE

4. High-Risk Hedging Positions and Trading Warranty Policy

Hedging/Locking refers to a situation where a trader holds two opposite trading positions on the same currency pair. This strategy carries a high level of risk and should ideally be anticipated or avoided by traders.

Pending Order Hedging using Buy Stop/limit and Sell Stop/limit orders or Market Execution within 1 hour before or after a major news release is not covered by the warranty system, regardless of whether one of the orders is later canceled.

This includes any strategy involving simultaneous placement of Buy Stop and Sell Stop orders (or a combination of one pending order and one market execution) intended to capture price movement during high-impact news events.

→ *If any part of the hedge remains active during the 1-hour window before or after the news release, it will be considered ineligible for warranty claims.*

Please consider this when planning your trading strategies.

5. Slippage or Spread Widening Within Acceptable Limits

Slippage or spread widening that remains within the maximum allowable threshold per instrument is considered a normal part of market behavior and is not covered under the warranty system.

Please note:

The maximum spread limits differ between normal market conditions and high-impact news events.

You may refer to the official Trading Warranty Policy ORBI TRADE for the full table of reference values per instrument.

WARRANTY CLAIM PROCEDURE

You have 1x 24 hours (Open Position) and 2x 24 hours (Close position) to request a warranty. The procedure is as follows:

Access the website or application.

- On the website, click on the three lines located at the top left and select "warranty form."
- On the application, open the main menu and choose "warranty form."

Create a new ticket by selecting "create a new ticket" (via website) or click the "+" sign (via app).

- Choose the account.
- Select the type of issue (open or close).
- Choose the transaction you want to file a warranty claim.
- Provide details about the problem and price.
- The warranty claim process is completed.

CALCULATION METHOD

The running price reference is the Bid price, as it is the price recorded on the MetaTrader history chart. Therefore, if there is a spread widening, it affects the Ask price.

Compensation is calculated based on the difference between the pending order price and the received price, not the difference between the bid and ask prices or the spread widening.

The warranty claim process for each transaction involves two sides: the opening position and the closing position.

For each warranty calculation process, the maximum spread will be subtracted or added:

- For Buy Position: Subtracted by Maximum Spread
- For Sell Position: Added by Maximum Spread

Gaps are empty spaces in the charts that arise due to price jumps caused by the "absence of transactions" at that price level. The gaps are purely a result of market movements, and therefore, Orbi Trade does not provide compensation for the price differences you encounter as a result.

Anything that occurs outside of this warranty algorithm is a trading risk you undertake and is not the responsibility of Orbi Trade.

Note:

This Agreement constitutes the entire agreement between the Parties and supersedes any prior agreement, understanding, or arrangement between the Parties relating to the subject.
